

Are you missing your left hand?

Join our robotics study!

Help us develop future bimanual robotic assistive systems, and receive compensation (500–1000 SEK gift voucher).

We are looking for participants who:

- Are between 18 and 80 years old.
- Are missing their left hand (transradial or wrist disarticulation amputation), meaning they have function in their left elbow or wrist but no fingers or no wrist on the left hand.

What does the study involve?

- Session 1: Fitting session (30 min) — you will be fitted with a robotic hand setup and VR headset at KTH Royal Institute of Technology in Stockholm.
- Session 2: Task session (2–3 hours) — you will perform everyday bimanual tasks using the robotic hand as a replacement for your left hand at KTH Royal Institute of Technology in Stockholm.
